## CSV File Used

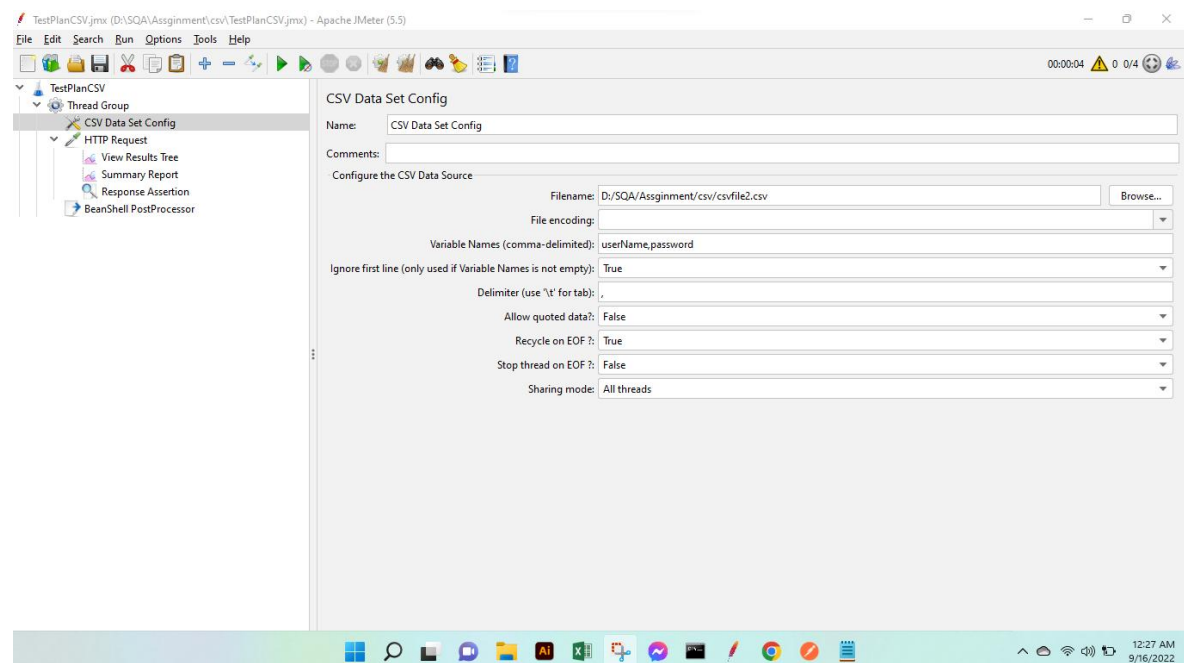

### USING CSV DATA SET CONFIG STEPS

First I will create a test plan. The Test Plan contains one Thread Group. The Thread Group consists of “CSV Data Set Config” and “HTTP Request ”. Also, I will add an “Response Assertion” and a “View Results Tree” “Summary Report”. See Figure 1.

#### 01. Thread Group

#### 02. CSV Data Set Config

**Filename:** if your file is in the /bin directory, enter just the filename. If it's somewhere else, use the full path to the file.

**Variable names:** Define your column name mapping as a list of comma-separated strings.

**Ignore first line?** If the first row of the csv file contains column names, enable this option. If the first row contains data, disable this option.
